### DETAILED ACTION

This application is a continuation-in-part of U.S. Application Serial Number 09/534,966.

Claims 1-11 are currently pending.

#### *Election/Restrictions*

1. Claims 4-11 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on June 8, 2004.

Accordingly, claims 1-3 are the subject of examination in the present Office Action.

#### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Mottez et al (J. Exp. Med. [1995] 181:493-502; U on form PTO-892).

Mottez teaches single chain constructs comprising an MHC class I heavy chain joined to  $\beta_2$ -microglobulin with a covalently bound antigenic peptide. Mottez teaches that linker, or spacer, sequences separate the segments (see entire document). The prior art teaching anticipates the claimed invention.

#### *Conclusion*

4. No claim is allowed.
